

Topic: 17. DRF Ordering / Sorting

Speaker: Personal | Notebook: API Development using Django Framework

1. This comes from the `REST_FRAMEWORK.FILTERS`. Update the `APIVIEWS.PY` as:

Update the `BlogsView` class:

2. Run your browser and you can view the IDs in ascending or descending order.

3. You can also sort by `blog_title`:

4. Just like the `SEARCH_PARAM` where we override it with our own label, we can do the same thing for ordering, we use the `ORDERING_PARAM`. Add this in our `SETTINGS.PY`:
