

Topic: Car Listing: Login Using Facebook Part 14B

Speaker: Udemy Instructor Rathan Kumar / Notebook: Django Project: Car Listing

1. You have used your personal FB account to create a new DEVELOPER FOR FACEBOOK account.
2. Follow the steps from the previous post on [SOCIAL LOGIN USING GOOGLE](#) to install the package, DJANGO-ALLAUTH.
3. You should have updated your CARZONE\SETTINGS.PY and CARZONE\URLS.PY configuration for social links.
4. Go to the ADMIN PANEL\SOCIAL APPLICATIONS and create a new record for Facebook.
5. Go to [DEVELOPERS FOR FACEBOOK](#) website and create an app to get the CLIENT ID and SECRET KEY.

The tutorial uses FOR EVERYTHING ELSE AS USE CASE, we select below as this is the current option.

https://developers.facebook.com/apps/creation/

Create an app

☒ Business portfolio...

☒ Use cases

☐ App details

☐ Review

What do you want your app to do?

These are the most common use cases developers have used on Meta for Developers. Each use case unlocks secondary use cases with more functionality. Customize use cases once your app is created. [Learn more about app creation.](#)

☒  **Authenticate and request data from users with Facebook Login**
Our most common use case. A secure, fast way for users to log into your app or game and for the app to ask for permissions to access their data to personalize their experience. [Learn more about Facebook Login.](#)

☐  **Launch a game on Facebook**
Launch a game that players can find and play directly in their Feed or messages/conversations, on both desktop and mobile devices. [Learn more about Instant Games.](#)

☐  **Access the Threads API**
Use the Threads API and choose to authenticate users, retrieve user information, post threads, reply to threads, manage reply settings and/or gather insights for a Threads profile you own or manage on behalf of others. [Learn more](#)

Looking for something else?
If you need something that isn't shown above, you can see more options by selecting Other.

☐  **Other**
Explore other products and data permissions such as ads management, WhatsApp and more. You'll be asked to select an app type and then you can add the permissions and products you need.

7.Go to your LOGIN.HTML and update,

Visual Studio Code interface showing a Django project named CARZONE-PROJECT. The Explorer sidebar on the left displays the project structure, including folders like cars, contacts, env, media, pages, photos, Resources, static, templates, and accounts. The file login.html is selected and highlighted with a red box.

The main editor displays the content of login.html, which includes Django template syntax. A red box highlights the following code block:

```
10 {% load socialaccount %}
11
12 <!-- for facebook Login -->
13 {% providers_media_js %}
```

The rest of the template code is as follows:

```
14
15
16 <!-- Sub-Banner starts -->
17 <div class="sub-banner overview-bgi">
18     <div class="container breadcrumb-area">
19         <div class="breadcrumb-areas">
20             <h1>Login To Your Account</h1>
21             <ul class="breadcrumbs">
22                 <li><a href="{% url 'home' %}">Home</a></li>
23                 <li class="active">Login</li>
24             </ul>
25         </div>
26     </div>
27 </div>
28 <!-- Sub-Banner end -->
29
30 <!-- Contact section start -->
31 <div class="contact-section">
32     <div class="container">
33         <div class="row">
```

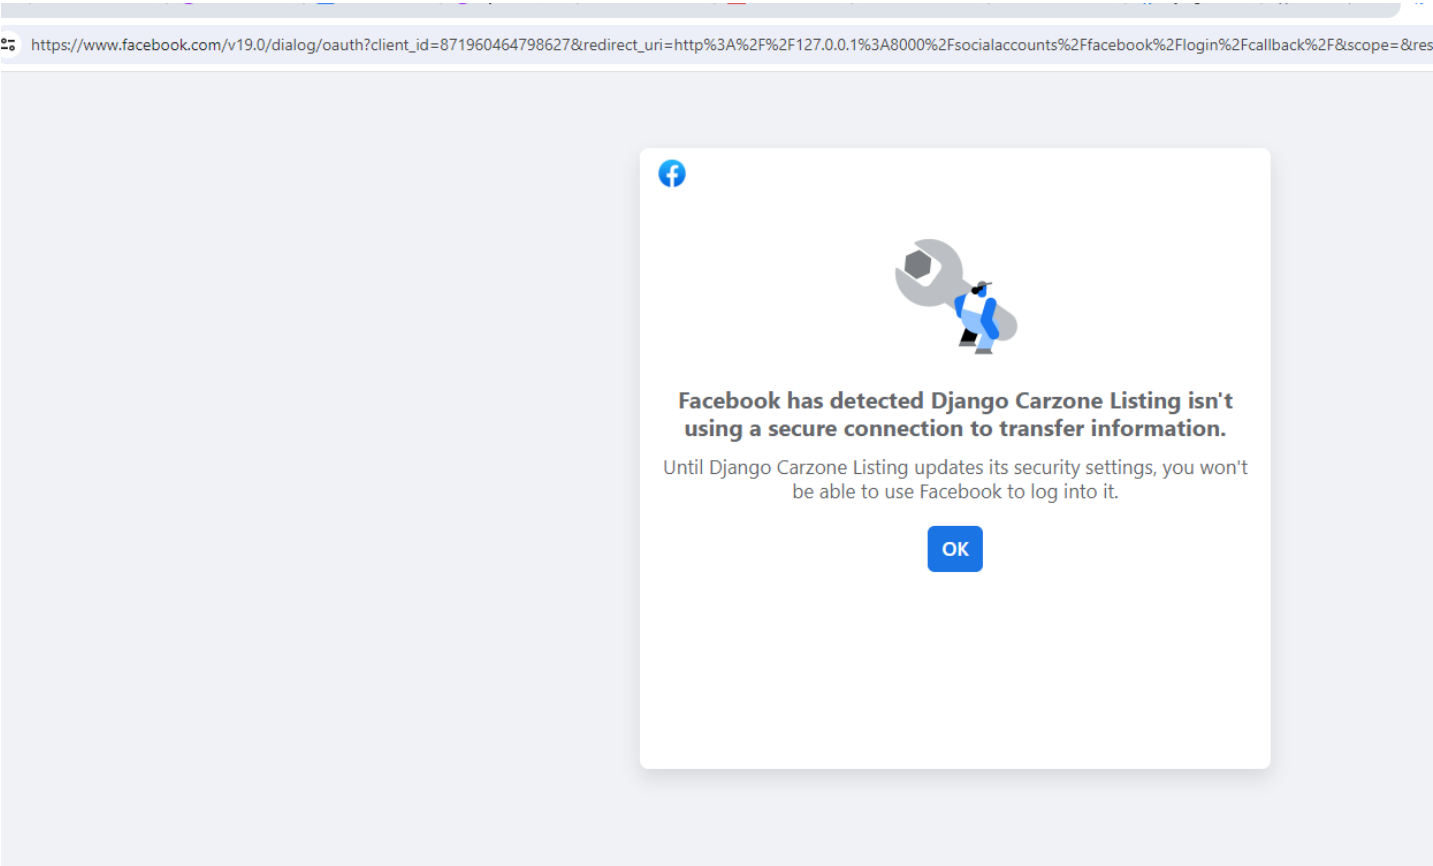

The bottom of the interface shows the TERMINAL panel with a list of HTTP requests and responses, indicating successful GET requests to various static files and API endpoints.

```

31 <div class="contact-section">
32   <div class="container">
33     <div class="row">
34       <div class="col-lg-12">
35         <div class="form-section">
36           <div class="form-group">
